

# Capilano Water Main Project

## Construction Is Coming

To continue providing clean, safe drinking water, Metro Vancouver will soon begin construction of the Capilano Water Main Project, which includes replacing an aging water main, installing new valve chambers, and connecting the new main to the existing system. The new main will deliver drinking water from the Capilano and Seymour watersheds to residents and businesses on the North Shore and across Metro Vancouver.

**Beginning mid-August, a new two-metre diameter water main will be constructed in sections along Capilano Road between Cleveland Dam Road and Edgemont Boulevard.**

To install the large main, the construction crew will move from north to south along Capilano Road, closing the road in approximately 200-metre-long construction zones, and detouring local traffic around each section. Capilano Road will remain open to local traffic except for within the construction zone.

During water main construction, all other traffic will be detoured away from Capilano Road. See map for traffic detour routes.

### Keeping traffic moving safely and efficiently.

Metro Vancouver is committed to ensuring safety in and around the project area, and minimizing the impacts of construction on traffic. Traffic activity in the project area and on detour routes will be monitored throughout the construction period.

For regular updates during construction, follow us on Twitter @MVRoadWork.

### Working closely with the community.

The Capilano Water Main Project is critical for the safe and reliable delivery of drinking water. Metro Vancouver is sensitive to the impacts this major construction project will have and has appointed a Community Liaison Officer to this project (see contact details below).

### Community Working Group

Metro Vancouver is forming a Community Working Group for the Capilano Water Main Project. The first meeting will be held on September 15, 2015. If you live near the construction zone, a meeting notification will be hand-delivered to your door. Information will also be available at [www.metrovancouver.org/CapilanoWaterMain](http://www.metrovancouver.org/CapilanoWaterMain).

### Contact us

**Community Liaison Officer:** 604-436-6986  
(Monday to Friday 8:00 am to 4:30 pm)

**Visit:** [www.metrovancouver.org/CapilanoWaterMain](http://www.metrovancouver.org/CapilanoWaterMain)

### It's Hot, It's Dry, Be #waterwise, Don't Waste A Drop.

Water consumption spikes in the summer mostly due to non-essential outdoor water uses like lawn sprinkling. We encourage everyone to do their part to conserve water at home, at work, and at play.
