Dear Councilors,

I am seeking your support by carefully considering the current development proposal. First of all I am concerned that the development guidelines were built generally on the specifications and economic priorities of the developer and not by the surrounding affected neighbors.

I support a seniors development and understood the proposed 'across the street' land use when I purchased my home several years ago. I also understood that I would also have been involved in developing guidelines prior to '*a developer lining up his excavating equipment*'.

I submit to you and the the senior's community that there is a better and less MONOLITHIC proposal to be built here! I welcome, support and will work with the community's seniors to design something better than what is being proposed at the moment. We must exercise some patience and solidarity in this matter. The divide and conquer tactics used by the developer to alienate two groups who will have to live together one day is not something any one of us want. Together we can achieve something better for all of us!

This does not have to be a contentious matter between future neighbors!

Please consider this approach.

Thank you for your consideration in this matter!
