Ms Hilsen:

The In Camera Council resolution of June 29 pertaining to the "Report of Harassment Inquiry Select Committee" (against Councillor Crist) is not only in violation of the Canadian Bill of Rights but is also in violations of various other aspects of Natural Justice. I strongly suggest that you seek advise from a source conversant with such issues since continuing efforts in the malicious pursuit of this matter against me will be construed as harassment. The mere fact that this motion was dealt with In Camera makes it ultra virus. You may advise Councillor Nixon that his motion to this effect at least should be presented in public rather than in a cloak and dagger fashion behind closed doors.

You my also advise Councillor Nixon that since he has been endorsed by a political civic party during the last civic election he is in a conflict of interest situation and cannot play any credible role in such an endeavor.

You may also advise him that notwithstanding any lack of legal expertise, natural justice in Canada takes precedent over any other aspect of law. I further wish to advise you that statements from accusers in the absence of the accused and without an opportunity on my part for cross examination not to mention legal representation is in itself a travesty of accepted norms of justice and only persons totally ignorant and/or contemptuous of the fundamentals of natural justice would subscribe and or take advantage of such a situation.

To put it crudely, such methods are reminiscent of show trials in Dictatorships but then I believe I have already mentioned this before. However, I would appreciate finding out how much money the District has spent in legal fees in the pursuit of this effort against me. As you know I have presented a motion to this effect to Council but I would appreciate if the procedure could be expedited as I believe that the community is very much interested in this information.

Thank You,

Ernie Crist
