I also support Bear Proof Garbage Containers. We secure ours with bungy cords. However we have had bears in our car port twice this year and they managed to get one turned over. There are many small children on our street.

regards Maureen Bragg

Subject: North Shore Bear Advocates

Dear all

I support requirements for bear proof garbage containers, not just to save bears, but for safety reasons. One of our neighbours keeps his garbage outside in ordinary cans; not only to we have garbage t spread over lawns and streets, but we have a succession of bears in the neighbourhood, even in daytime. There is a path to the school here. Sooner or later, we will have a tragedy.

Some thought need also be given to bird feeders and fruit trees, but I think garbage is the big issue.

sincerely

John Hunter
