Dear Mr Ridge:

I recently requested a list of initiatives and motions from staff on amalgamation between the City and the District of North Vancouver from 1950 to 2004. But once again the list I received is incomplete. I myself produced more than on initiative and brought forward more than one such motion including one in the last 5 years calling for a step by step effort to bring about amalgamation between the City and the District.

The latest effort in this regard stated that in the event that the City refuses to pursue meaningful discussions, the District cancel all agreements with the City on Shared Services except those which are of benefit to the District as the case may be. However, once again the material I received is incomplete. The latest motion on my part in particular has been left out as indeed has other material submitted to Council including initiatives by M. Baker during her tenure as Mayor of the District.

Since may requests in the past have led nowhere, I hereby ask that I receive all the material including a copy of the motions themselves as there is an incredible amount of misinformation bandied about including by the press, the North Vancouver Chamber of Commerce and subsequently the candidates in the upcoming election. For the sake of truth I suggest we dig into the archives if necessary and get all the facts.

Thank you for your help,

Ernie Crist
