Dear Susan, Graham, and Richard:

It was part of my understanding that this Overlord race would not go near, or through, Mountain View Park! According to this official Overlord Race map (below), they did! Since they have ignored DNV, they should not be allowed to hold another race on the North Shore, next year...

I thought that I saw a few very rugged fully armoured riders coming out of Mountain View Park, but could not tell if they were with the race or not. **Thanks to their "honesty" this map proves that the mountain biker racers came out of Mountain View Park without permission to do so:**

http://www.northshoreoverlord.com/North_Shore_Overlord/Rules.html

6. What trails are off limits?

Great question. **Closed trails, those in *Mountain View Park**, and non-sanctioned trails are all off limits. **This includes** (but is not limited to) Pink Starfish, Bookwus, ***Lower Gryphon (sic) Switchbacks, Imonator**, St. George's, GMG, Groovula, 38DD, Air Supply, etc.).

Why does DNV keep giving out such Permits, like candy, to these kinds of people in the first place? "Rules? What rules?" Exactly!

So there you have it folks. You just can't trust the mountain bikers, and never really could. Now, why not try trusting the conservationists? We are not out to fleece you,

nor out to break the rules. We are not out to conquer and destroy the natural environment. We wish to help repair it. Is that such a bad thing? From looking at past responses from DNV, people would believe it so. Please choose your "friends" carefully, while you still have a chance. Future generations will thank you for it.

--Monica Craver--

Protect, conserve and restore Mountain View Park wetland and upland area!
